Professional Summary

Data Analyst and Computer Science graduate with hands-on experience in SQL, Python, and Power BI. Proven ability to build end-to-end data analytics pipelines, statistical modeling workflows, and interactive dashboards. Skilled at translating complex data requirements into actionable business insights with demonstrated problem-solving rigor.

Skills

Programming & Analytics: Python, SQL, Pandas, NumPy, Excel

BI & Visualization: Power BI, DAX, Tableau, Matplotlib, Seaborn

Machine Learning: Scikit-learn, XGBoost, Feature Engineering, Hypothesis Testing

Databases & Tools: PostgreSQL, MySQL, MongoDB, Git, VS Code

Experience

Data Science Intern Dec 2025 – Feb 2026

Codec Technologies Pvt. Ltd. *India*

- Developed end-to-end credit risk classification models evaluating loan default probabilities on over 50,000 borrower profiles.
- Engineered 18 domain-specific risk features optimizing data preprocessing and feature encoding pipelines in Python.
- Evaluated multi-model performance achieving 89% ROC-AUC using XGBoost with balanced precision-recall trade-offs.
- Built automated risk assessment dashboards and documentation summarizing predictive insights for stakeholders.

Projects

Supermarket Sales & Performance Analytics

Technologies: Python, SQL, Analytics

- Conducted exploratory data analysis across 1,000+ branch transactions identifying key revenue drivers and peak hours.
- Designed interactive Power BI dashboards visualizing monthly customer spend, product line margins, and branch rankings.
- Delivered statistical inventory and sales trend insights reducing reporting turnaround time by 30%.

Brazilian E-Commerce End-to-End Analytics Pipeline

Technologies: Python, SQL, Analytics

- Extracted and cleansed 100,000+ Olist customer orders using PostgreSQL queries with complex multi-table joins.
- Analyzed customer lifetime value, delivery latency, and seller performance metrics across regional hubs.
- Built predictive customer satisfaction models using Scikit-learn with rigorous cross-validation.

Telecom Customer Churn Prediction & Retention Strategy

Technologies: Python, SQL, Analytics

- Analyzed 7,000+ subscriber records identifying critical churn risk factors including contract duration and service type.
- Trained random forest classifiers and optimized decision thresholds improving high-risk churn recall to 82%.
- Synthesized actionable retention recommendations and cohort segmentation strategy for account management.

Education

Bachelor of Technology in Computer Science 2021 – 2025

Vidya Academy of Science and Technology Kerala, India

CGPA: 8.24/10

Certifications

- IBM Data Science Professional Certificate

- IBM Data Analyst Professional Certificate
